### PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student with 4 internships in Java, Spring Boot, Full Stack and AI/ML development. Built Vaprideen AI, an enterprise AI operations, governance and security platform, along with full-stack and AI-powered applications using Java, Spring Boot, React.js and Python. Winner of Smart India Hackathon (SIH), Internal Level and 2nd Prize winner at a 24-hours national-level hackathon, with participation in 7 hackathons. National Gold Medalist in Jump Rope and Kalam's World Records Participant. Seeking a Software Engineer role to build reliable, scalable systems.

### EDUCATION

**B.E., Computer Science and Engineering** | Suguna College of Engineering, Coimbatore 2023 – 2027

Affiliated to Anna University, Chennai | CGPA: 8.0 / 10 (till 6th semester)

**Higher Secondary (12th)** | Government Boys Higher Secondary School, Cuddalore 2022 – 2023

Tamil Nadu State Board | Computer Science stream | 72%

### TECHNICAL SKILLS

|                |                                                                                                      |
|----------------|------------------------------------------------------------------------------------------------------|
| Languages      | Java, Python, JavaScript (ES6+), TypeScript, SQL                                                     |
| Backend        | Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security (JWT), REST APIs, JDBC          |
| Frontend       | React.js, HTML5, CSS3, Tailwind CSS, Bootstrap                                                       |
| Databases      | MySQL, MongoDB, PostgreSQL                                                                           |
| AI/ML          | Machine Learning, Deep Learning, NLP, Generative AI, LLMs, RAG   NumPy, Pandas, Scikit-learn, OpenCV |
| Cloud & DevOps | AWS, Docker, Vercel, Render                                                                          |
| Tools          | Git, GitHub, Maven, JUnit, Postman, IntelliJ IDEA, VS Code                                           |

### INTERNSHIP EXPERIENCE

**AI Intern** — CodeOrbit Tech Aug 2026 – Present

- Developing and training ML models in Python using Scikit-learn, NumPy, and Pandas.
- Handling data collection, cleaning and preprocessing to prepare datasets for model development.

**Java & Full Stack Intern** — QuenoXa Global Technologies Jun 2026 – Jul 2026

- Developed E-Learning Management and Event Ticket Booking systems using Java, Spring Boot, React.js, REST APIs and MySQL.
- Designed the database schema and developed REST APIs across application modules.

**Full Stack Intern** — Brainerly Spot Technology Dec 2025 – Jan 2026

- Developed frontend, backend and database features using React.js, Spring Boot and MySQL with REST API integration.
- Worked in a Git-based workflow for version control and collaborative development.

**Generative AI Intern** — AdroitT Technologies (Oracle University) Mar 2025 – May 2025

- Built a Generative AI application in Python using prompt engineering to improve response quality.
- Applied Generative AI techniques to develop AI-powered solutions.

### PROJECTS

**Vaprideen AI — Enterprise AI Operations, Governance & Security Platform (Team Leader)** Final-Year Project

Python, Java, Spring Boot, React.js, MongoDB, AWS

- Developed AI model management, monitoring and cost analytics using Spring Boot REST APIs and React.js.
- Integrated LLM/RAG with MongoDB for AI risk and security governance.
- Implemented risk assessment, policy enforcement and centralized AI activity monitoring.

**Real-Time Auction & Bid Management Platform (Team Leader)** 2nd Prize — National-Level Hackathon (Mar 2026)

React.js, Java, Spring Boot, MongoDB

- Built Spring Boot REST APIs and backend validation logic for product listings, bidding, bid history and winner selection.
- Developed a React.js admin dashboard to manage products, auctions, bids and auction status.
- Built and demoed the complete platform within the hackathon's 24-hour window.

**AI-Driven Healthcare Intelligence Platform (Team Member)** Finalist — National-Level Hackathon (Oct 2025)

Python, AI/ML, NLP, HTML, CSS, JavaScript

- Designed the end-to-end query-processing pipeline and a user-facing dashboard for AI-driven health responses.
- Developed an NLP chatbot for symptom-related queries with context-aware responses.
- Implemented an offline response workflow so core chatbot functionality works without continuous internet connectivity.

### ACHIEVEMENTS

- Gold Medalist** — National Jump Rope Championship, Indian Jump Rope Federation July 2022
- Gold Medalist** — South India Level Urban Games Championship, World Urban Games Aug 2022
- Silver Medalist** — Inter-School Table Tennis Tournament, Thanjavur District Table Tennis Association Dec 2022
- Kalam's World Records Participant** — Non-Stop 24-Hour Continuous Programming Codeathon June 2024
- Winner** — Smart India Hackathon (SIH), Internal Level Sep 2026
- 2nd Prize** — 24-Hour National-Level Hackathon, Suguna College of Engineering Mar 2026

### CERTIFICATIONS

- Cisco Networking Academy & Anudip Foundation — Full Stack Web Development Jun 2026
- AWS — Solutions Architecture Job Simulation Oct 2025
- Forage — GenAI Powered Data Analytics Job Simulation Oct 2025
- IBM — Introduction to Artificial Intelligence Sep 2025
- Linux Foundation — Introduction to DevOps and Site Reliability Engineering July 2026
- HackerRank — Java (Basic), Python (Basic) July 2026
